PROFESSIONAL SUMMARY

Software Engineer with nearly 4 years of experience specializing in back-end development with Node.js and AWS infrastructure. Proven track record delivering scalable applications and AI-integrated chatbots within Agile/Scrum environments. Passionate about problem-solving and software engineering, continuously expanding technical capabilities by mastering new programming languages, refining existing expertise, and deepening my knowledge of cloud technologies and system architecture. I am always eager for a new challenge where I can contribute to an innovative team and further develop my skills.

WORK EXPERIENCE

Software Engineer | Feb 2024- Oct 2025

Accenture Brazil

- **Backend & Cloud Architecture:** Engineered and maintained a high-traffic WhatsApp chatbot using Node.js, AWS, and MongoDB, effectively automating critical customer service operations.
- **Generative AI Integration:** Implemented GenAI capabilities into the conversational flow using AWS Bedrock agents, utilizing AWS Lambda for seamless serverless execution.
- **Infrastructure Management:** Managed cloud deployments using AWS Elastic Beanstalk and monitored application health, performance, and logs via AWS CloudWatch.
- **Agile Delivery:** Actively participated in all Scrum ceremonies consistently delivering new features and resolving complex bugs.

Software Engineer Intern | Feb 2022- Jan 2024

Accenture Brazil

- **WhatsApp Bot Backend (May 2023 – Jan 2024):** Transitioned to the core backend team, contributing to the development of the Node.js/AWS chatbot, implementing logic features, and managing the MongoDB database in the cloud.
- **Full-Stack Web Development (Feb 2022 – May 2023):** Engineered a web platform building responsive interfaces and robust APIs using Node.js and React.js. Managed data with MongoDB and Redis, and utilized Jenkins for continuous integration and deployment pipelines.
- **Agile Collaboration:** Engaged in daily Scrum meetings and technical alignments, ensuring high-quality code delivery within sprint deadlines.

ACADEMIC HISTORY

Bachelor's Degree in Computer Science | Aug 2022- Jul 2025

Federal University of Rio de Janeiro

My Computer Science studies at the Federal University of Rio de Janeiro were strongly focused on applying theoretical knowledge to practical, real-world challenges. Beyond the core curriculum, I actively contributed to several extracurricular projects. I applied fundamental programming and data structure concepts in initiatives like Caronaê and the Museum of Computing. More recently, I took on the role of Web Designer for the LabEscola 3D project, where I designed and launched a complete website using WordPress and the Elementor plugin, demonstrating versatility and the ability to quickly master new technologies to deliver project goals.

Technical Course in Software Development | Mar 2018- Oct 2019

Fundação Bradesco

Completed a comprehensive 1000-hour technical program that provided a strong foundation in software engineering prior to my university studies. The curriculum was designed to build practical skills across key areas of IT. In the Database module, I developed hands-on proficiency in data modeling and SQL. The Systems Development module provided a solid base in programming logic and different programming languages. I also explored web development fundamentals in the Mobile & Web Development module, covering project lifecycles and UI/UX planning. This technical knowledge was complemented by the IT Governance module, where I studied project management principles, professional ethics, and effective business communication.

LANGUAGES

Portuguese

Native

English

B2: Upper-Intermediate

SKILLS

- **Backend & Cloud:** Node.js, Amazon Web Service (AWS), Google Cloud Platform (GCP), IBM Watson Assistant;
- **Frontend & UI/UX:** React.js, React Native, Figma;
- **Databases:** MongoDB, PostgreSQL, Redis;
- **Languages:** TypeScript, JavaScript, Java;
- **Tools & Methodologies:** Git, Scrum, Agile Development, Jenkins;
